

# Christmas hearts in leather

## The products you need:

- Leather strap – can be cut by our staff
- Leather lace
- Hobby knife
- Cutting board
- Ruler
- Hammer
- Rivets
- Rotary punch tool
- Cardboard for template

### Step 1

Cut the leather strap into the length, you want the heart to be.  
Fold the leather strap in the middle and punch a hole using a rotary punch tool. Make the hole approx. 2 cm from the fold, depending on the size of the heart.

### Step 2

Place the leather lace between the fold and the rivet. Stick the rivet through the punctured holes – remember to use a top and a bottom rivet. Place a piece of leather between the rivet and the hammer, so that the leather doesn't get damaged.  
Use your rotary punch tool to punch a hole at the bottom of the heart and apply then a rivet.
