Wall clock in leather

The products you need:

- Leather
- Cutting board
- Hobby knife
- Stamps
- Glue
- Ring
- Hammer
- Ruler
- Black marker
- Pencil
- Cardboard
- Clockwork

Step 1 Cut out a piece of cardboard in the size, you want your wall clock to be. Outline the cardboard onto the back of the leather.	Step 2 Cut the leather following the outline.	Step 3 Mark the middle of the round cardboard template.	Step 4 Cut a hole large enough for the clockwork to come through the cardboard and the leather.	Step 5 Tip: use these tools for making the time indications on the leather.	
Step 6 In this step, you can freely choose if you want to stamp numbers, symbols, dots, etc. onto the leather.	
Step 7 Outline the stamps with a thin black marker if you want to accentuate the stamps.	Step 8 Use a hammer and stamp for stamping a name, word, pattern, etc. onto the leather.	Step 9 Glue the leather and cardboard together to stabilize the leather.	
Step 10 Install the clockwork.	
Step 11 When making this tutorial, we decided to attach a piece of leather string to hang the wall clock. This is, however, completely optional. If you want to attach a piece of leather string to your watch as well, just take a piece of cardboard and glue it onto the wall clock with the leather string between the two.
